

Rapheal Clinton

Frontend Engineer | Software Engineering & AI Evaluation

Ipetumodu, Osun State, Nigeria | +234-704-942-5399 | clintonrapheal5@gmail.com |
honcho-code.github.io

SUMMARY

Frontend engineer with a UI/UX design background and hands-on experience building and shipping production web applications. Skilled in React, Next.js, JavaScript, TypeScript, Tailwind CSS, API integration, authentication, databases, Git, and collaborative software development. Experienced in translating product requirements and Figma designs into working interfaces, debugging implementation issues, and making practical engineering decisions in small team environments. Strong interest in technical AI evaluation, including code review, software engineering reasoning, debugging, and evaluating the quality and correctness of AI-generated solutions.

EXPERIENCE

Lead Frontend Engineer — GlamLens Jul 2025 – Present

- Lead frontend development for an e-commerce platform using React, Tailwind CSS, and shadcn/ui, working closely with the product designer to translate designs into production interfaces.
- Collaborate with backend engineers on API integrations and authentication flows.
- Make frontend architecture and implementation decisions within a small, fast-moving startup team.
- Review and troubleshoot frontend implementations while maintaining consistency across product features.

Freelance Full-Stack Developer 2025 – Present

- Built and shipped production web applications for independent clients across frontend, backend, database design, authentication, payments, and third-party integrations.
- Worked from requirements and Figma designs through implementation, testing, debugging, and delivery.

PROJECTS

OUI Clearance System 2025

Project link: <https://school-clearance-system.vercel.app/>

React, Node.js/Express, PostgreSQL, Socket.io — full-stack digital clearance platform for a university client. Designed a multi-role system with parallel document review and multi-stage approval workflows. Implemented PDF clearance letters with unique certificate IDs, real-time status updates, JWT authentication, and email notifications.

Dual Sub 2025

Project link: <https://dualsub-nine.vercel.app/>

Next.js 14, MongoDB, Paystack — subscription reseller platform rebuilt from an Express/MongoDB backend into a Next.js App Router application. Built a multi-step checkout flow, integrated Paystack payments, and designed and seeded a MongoDB Atlas database for production use.

AI-Powered Food Calorie Estimation & Fitness Tracking System 2026

Project link: <https://fittracker-1.vercel.app/>

Final-year BSc project. Designed and built a web application that combines AI-based food calorie estimation with user-facing fitness tracking tools.

EDUCATION

BSc Computer Science — Oduduwa University, Ipetumodu, Osun State 2022 – 2026

SKILLS

Development: React, Next.js, JavaScript, TypeScript, Node.js/Express, Tailwind CSS, shadcn/ui, PostgreSQL, MongoDB, Firebase, Socket.io, Git

Engineering: API Integration, Authentication, Debugging, Code Review, Responsive Web Development, Frontend Architecture, Team Collaboration

Design: Figma, UI/UX Design, Wireframing & Prototyping, Responsive Design

LANGUAGES

English (Native)
